

PUBLIC TRANSPARENCY REPORT
2025

Hannoversche Alterskasse VVaG

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

SENIOR LEADERSHIP STATEMENT (SLS)

SENIOR LEADERSHIP STATEMENT

SENIOR LEADERSHIP STATEMENT

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

A pension fund's greatest lever for promoting a sustainable economy is sustainable investment. As a mutual insurance company, we use the capital entrusted to us exclusively for the benefit of our members. Our members want us to invest their money safely, profitably and sustainably at the same time. We therefore base our investment decisions on social, ethical, governance related and ecological criteria. These apply to 100 percent of our investments. We differentiate according to clear exclusion and positive criteria for the various asset classes and, in cooperation with our Sustainability Council, regularly adapt these criteria to the current state of science, technology, or regulatory requirements.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

In October 2024, we discussed our Sustainability Guideline with our external Sustainability Council. The update specifies and complements the exclusion resp. positive criteria for banks. The updated version was approved by the Board of Directors during the Board meeting in November 2024. We are increasingly investing in green, social and sustainability bonds issued by companies, banks and sovereigns. Financing of green, social resp. sustainable projects should lead to specific ecological and / or social improvements and thus contribute to a sustainable development.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We want to identify areas that will contribute to solving social and ecological problems and derive investment possibilities from these, e.g. in the area of renewable energies, circular economy, affordable housing, clean transportation and organic farming. In addition, we intend to review our exclusion and positive criteria for companies, sovereigns and real estates. Furthermore we plan to refurbish our own residential buildings and to grant leaseholds in line with social and ecological criteria. We will also consider the general conditions for a minimum percentage of sustainable investments according to the EU Sustainable Finance Disclosure Regulation. In addition, we aim at a better understanding of the climate risks in the different asset classes and better insights in CO2-reporting approaches.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.
